**MADE SAFER
FOR AUSTRALIA**

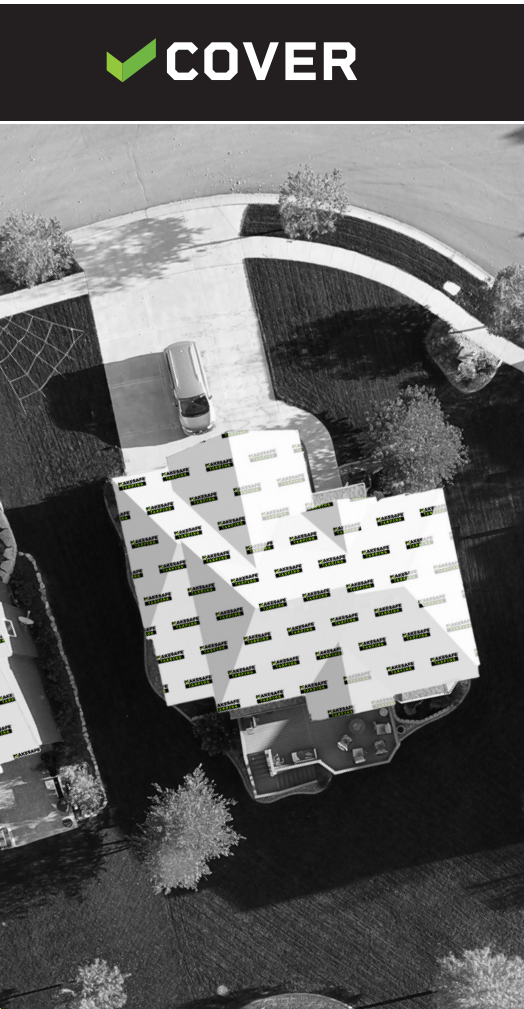

THE FUTURE TARP

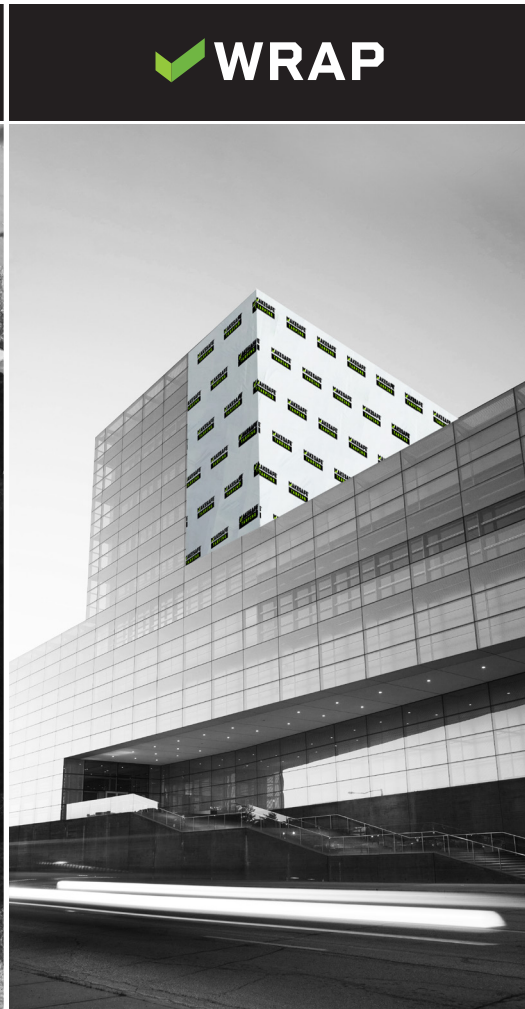

SIMPLER, SMARTER, STRONGER AND
SAFER FOR AUSSIE CONDITIONS

✓ COVER

✓ WRAP

✓ CONTAIN

MAKESAFE TARPING IS A REVOLUTIONARY NEW TEMPORARY ROOFING SOLUTION MADE FROM REINFORCED, DISPOSABLE PLASTIC SHEETING.

Unlike traditional tarping solutions, MakeSafe Tarping is incredibly light and tear resistant. It requires no ropes and sandbags to install and will not flap around or fly away in the wind.

MakeSafe Tarping easily molds to the most complex of rooflines providing a superior water-tight temporary roofing solution compared to traditional tarps and other products. It can be cut around penetrations (such as pipes) and does not interfere with the collection of rainwater. It lasts for 12 months even in extreme weather conditions.

MakeSafe Tarping is the recommended temporary roofing solution for one of Australia's leading insurance groups and trades people everywhere.

**It comes in lightweight,
easy-to-transport rolls.**

The largest size comes in a 20m x 6m roll and can cover a roof area of 120m². The 30m x 2m is perfect for covering skydomes and skylights in factories.

SIMPLER

- ✓ Quick to install
- ✓ Fast - screw down to any roof
- ✓ Easy to cut to size
- ✓ Cuts around penetrations
- ✓ No ropes or sandbags
- ✓ Contours to every roof shape
- ✓ Join and repair instantly with MakeSafe Tarping Muscle Tape
- ✓ Training and installation app available

SMARTER

- ✓ Reduce revisits
- ✓ Lighter - each tarp only 30kg
- ✓ Specially manufactured for Australian conditions
- ✓ No wind noise, flapping or water pooling
